

# Event Report: Discover India – The Puzzle Hunt

## **1. Event Overview**

Event Name: Discover India – The Puzzle Hunt

Date of Event: February 7, 2025

Venue: VLTC L-008, MNIT Jaipur

Organized by: Think India MNIT

## **2. Introduction**

Discover India – The Puzzle Hunt was an interactive and engaging event designed to test participants' problem-solving abilities while fostering awareness about India's rich heritage. The event featured a structured puzzle hunt where participants had to solve a series of riddles, leading them to hidden puzzle pieces. The challenge was to collect all the pieces and complete the map of India before others.

Event Theme: A strategic puzzle-solving challenge centered around India's geography and culture.

### ***Objective:***

- To promote problem-solving skills, logical reasoning, and teamwork.
- To create an interactive learning experience about India's cultural and geographical diversity.
- To provide a competitive yet engaging activity for students.

**Target Audience:** The event was open to all students of MNIT Jaipur, encouraging participation from different academic disciplines.

## **3. Event Highlights**

Description:

The event was structured in two phases. In the first phase, participants solved riddles that guided them to different locations within the venue where puzzle pieces were hidden. The collected pieces were assembled in the second phase to complete the India map, determining the winner.

Activities:

- Riddle-solving round: Participants deciphered clues to locate puzzle pieces.
- Puzzle assembly: Once all pieces were collected, participants raced to complete the India map.
- Final challenge: The fastest and most accurate team to assemble the map was declared the winner.

Participation: The event saw enthusiastic participation from multiple teams across different departments. The competitive yet fun nature of the challenge kept participants engaged throughout.

#### **4. Challenges Faced**

- Some participants found certain riddles challenging, requiring additional hints.
- A few teams struggled with locating all the puzzle pieces, adding to the complexity of the game.
- Time management was a crucial factor, as teams needed to balance speed with accuracy.

#### **5. Feedback and Suggestions**

Participants' Feedback:

- The event was well-received, with participants appreciating the unique format and interactive nature.
- Many participants suggested increasing the difficulty level of the riddles for future editions.
- Some recommended expanding the event to a larger space to accommodate more teams.

#### **6. Conclusion**

Discover India – The Puzzle Hunt was a successful event that combined logical thinking, teamwork, and cultural learning. The competition was intense, and the challenge format kept participants engaged from start to finish. The event not only entertained but also educated participants about India's geography in an interactive manner.
